

English – To learn how to write a great story by building strong introductions, an exciting build-up, creating a clear conflict, and finishing with a satisfying solution and ending. They will understand how to hook the reader, use descriptive language, and organise events so their stories flow smoothly. The children will write their own adventure about a mysterious carnivorous plant that causes chaos before everything is resolved. Also through daily SPaG lessons, they will practise using punctuation, grammar, and new spelling patterns, while continuing to build confidence in reading fluently and writing creatively.

PSED – The children will explore what makes a great friend by learning how to show kindness, listen carefully and take turns when working or playing together. They will practise ways to solve small problems calmly and use positive friendship skills to include others. Children will also reflect on how good friends make us feel safe, supported and happy, and how they can be a great friend to others every day.

Topic – Children will learn all about weather by exploring different types of weather and how they change from day to day. They will observe and record weather patterns, think about how weather affects our daily lives, and compare the weather in the UK with other parts of the world.

Science – Children will investigate plants by exploring how they grow, what they need to stay healthy and the different parts that help them survive. They will learn to identify roots, stems, leaves and flowers, and understand the job each one does. They will also carry out simple investigations to discover how water travels through a plant.

PE – Children will explore athletic movements, learning to apply key running skills, jumping techniques and throwing skills across different activities. They will develop control, coordination and consistency when running, experimenting with varied jumping styles, and improving balance through practice.

Computing – Learn how to compose a musical sequence by exploring and combining different sounds to create layered effects. Children will build confidence in using layering techniques to produce a short piece of digital music that is creative, structured and uniquely their own.

Maths – Children will strengthen their understanding of multiplication and division by learning how to use arrays, groups and number facts to solve problems with growing confidence. They will explore how these operations are connected and apply their skills to real-life contexts and reasoning challenges. They will also learn to recognise fractions, compare and find simple fractions of shapes and quantities. Through practical activities and visual models, they will build a secure understanding of how fractions represent equal parts of a whole.

Design and Technology – Children will learn how to peel and chop a range of fruits and vegetables safely and accurately. They will explore how to combine fresh ingredients to make simple, healthy snacks that are colourful, tasty and nutritious. Children will practise good hygiene routines and handle equipment responsibly as they prepare food with increasing independence.

How to get involved at home - Reading books will be sent home but they are needed in school on a daily basis. Please check Dojo regularly for news and updates. PE kits needed for PE on Wednesday and Thursdays.

Don't hesitate to contact us with any questions or concerns. Thank you!
