

Willows Class Exploring Coastlines and Oceans – Summer 2

Fellgate
Primary School

English

This half term the children will continue to develop their understanding of phase 2, 3, 4 and 5 phonemes and use their growing phonetical knowledge to read and write words. During our English lessons we will be reading stories linked to oceans and seas. We will be creating fact files about different sea creatures, retelling stories and creating leaflets.

Art

Our art will be inspired by the artwork of Andy Goldsworthy. We will be creating patterns and using natural materials within our artwork.

Computing

This half term our focus will be on technology and the concept of digital music. The children will recognise different forms of technology within the wider world and will use technology to compose digital music.

PE

This half term we will continue our weekly swimming sessions at George Washington Primary School. The children will also be practicing the different events in preparation for our Sports Day.

PSHE

The children will be identifying what a friend is and how to be a good friend. They will recognise and name feelings they and their friends may have and what they can do. They will develop strategies to support resolving conflicts with friends and taking turns and sharing well.

How to get involved at home

Reading books will be sent home but they are needed in school on a daily basis.
Please check Dojo regularly for news and updates.
PE kits are needed for PE on Thursdays.
Don't hesitate to contact us with any questions or concerns. Thank you! **Willows Team**

Maths

In Maths this half term the children will continue to use concrete objects to solve one step problems involving multiplication and division. They will recognise and use language linked to dates and tell the time to o'clock, half past, quarter past and quarter to. The children will develop their understanding of capacity and weight and begin to measure and record the capacity and volume of different objects.

History

Our focus will be on identifying changes over time. The children will make comparisons between seaside holidays and visiting the beach today in comparison to Victorian times. They will do this by looking at pictures and identifying similarities and differences.

Science

In science this half term, the children will learn about different materials. They will identify and name a variety of everyday materials, including wood, plastic, glass, metal, water and rock. They will also be able to describe the physical properties of different materials.
